## THE ITALIAN DIGITAL AGENDA

The Agency for Digital Italy (AGID) has been established by the Italian Government on the 1<sup>st</sup> of March 2012 after the signing of European Digital Agenda by all Member States. The AgID task is to coordinate the central and territorial administrations actions and to define the Italian Digital Agenda within the framework of the European Digital Agenda. Italy, by differentiating its own strategy from the European one, has identified its own priorities and intervention procedures, as well as the actions to be implemented according to specific indicators.

Italian Digital Agenda pillars are:

- the digital identity and the innovative services for the citizens;
- the diffusion of the wide and ultra-wide band
- the coin and the electronic billing;
- the digital Administration;
- the digital Education;
- the digital Health System;
- the digital Justice.

In the framework of the [Partnership Deal 2014-2020](#) the Presidency of the Council of Ministers together with the Ministry for Economic Development, the Agency for Digital Italy and the Agency for Territorial Cohesion has provided the national plans "Digital Growth" and "Ultra-wide Band National Plan" always in the perspective of the pursuit of the Digital Agenda objectives.
